Software Engineer | Front-End Developer | Full-Stack Developer

Entry-level Software Engineer with practical experience across full-stack web development, ERP product engineering, and IoT-connected applications. Delivered production-grade backend APIs, frontend interfaces, and event-driven features using JavaScript, TypeScript, Python, and SQL, with additional embedded systems experience in C and Rust. Motivated to contribute to modern engineering teams and continue developing technical depth across the stack.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, C, Rust
- **Backend and APIs:** Node.js, Express, REST APIs, JWT authentication, middleware authorization, GraphQL ecosystem exposure
- **Frontend:** Svelte, Vue 3, Ionic, React, Tailwind CSS, component-based UI development
- **Architecture and Patterns:** Event-driven architecture, transactional outbox, Strategy pattern, idempotency design
- **Data and Persistence:** PostgreSQL ecosystem exposure, DuckDB, dbt, pandas, ELT workflows
- **Quality and Delivery:** Jest, Vitest, Cypress, Mocha, ESLint, CI workflow fundamentals

PROFESSIONAL EXPERIENCE

OpusFlow

Feb 2026 - Jul 2026

Graduation Internship - Software Engineer

- Designed and implemented a Gamification Engine prototype integrated into the OpusFlow SaaS platform.
- Implemented asynchronous event processing via a hybrid transactional outbox pattern to avoid blocking core ERP operations.
- Build rule-driven achievement evaluation for five research proven achievement types with tiers, badges, progress trackers and a creatively designed UI.
- Implemented reliability mechanisms including idempotency controls and immutable audit logging.
- Delivered 64 unit tests across 10 suites with the Jest testing framework and completed end-to-end integration testing.
-

ProfitFlow

July 2023 - Mar 2024

Junior Software Engineer

- Worked on a CommandBar onboarding/action feature.
- Worked on the overhaul of the SaaS platform interface.
- Performed testing of the SaaS platform through PlayWright testing.

ProfitFlow

Feb 2023 - July 2023

Internship - Software Engineer

- Contributed to visual overhaul work for the core SaaS platform interfaces.
- Implemented and documented CommandBar onboarding/action feature work.
- Produced technical design, functional design, and requirements documentation in supervisor-reviewed cycles.

EDUCATION

Bachelor of Science HBO-ICT Software Engineering, Saxion University of Applied Sciences - Deventer 2026
